

Vulcascot Rubber D-Fender

Product Information

The Vulcascot Rubber D-Fender provides a reliable and cost-effective solution for protecting structures, vehicles, and equipment from everyday impact damage.

Manufactured from durable, high-filler rubber compounds, this profile combines excellent toughness and resilience, making it ideal for light-to-medium duty applications. Designed for general protection in addition to harsh or marine environments.

Ideally used for Multi-storey car parks, Loading bays and service yards, Warehouse walls and pillars, Vehicle bays and dock areas. Robust rubber construction offering effective impact absorption and wear resistance.

Available in three sizes – 1m, 2m and 3m lengths

- Easy to install – bolt-on or bonded to most surfaces
- Suitable for indoor or sheltered outdoor environments
- Made of high-quality tough, durable black rubber
- Suitable for indoor or sheltered outdoor environments
